

GRC Receives Innovation In Liquid Cooling Award

Corporate LiveWire Celebrates GRC for Helping Customers Create Innovative Data Centers

GRC Awarded Spot on ‘Top 25 Data Center Tech Companies’ List by CIO Applications Magazine

CIO Applications magazine has named Green Revolution Cooling as one of the Top 25 Data Center Companies – 2017 by CIO Applications Magazine.

Liquid Immersion Cooling from Green Revolution Cooling helps Tokyo Institute of Technology Achieve Top Honors at Green500 Three Years in a Row

The latest Green500 list of most efficient supercomputers in the world was announced during the SC15 conference in Austin, Texas. For the third consecutive year, the Green Revolution Cooling-powered Tsubame-KFC supercomputer at Tokyo Institute of Technology has achieved top honors, this year ranking as the most efficient commercially available setup, and second overall.

Green Revolution Cooling Places #1 on Green500

Green Revolution Cooling and TiTech win Green 500 for cooling world’s greenest supercomputer. The TSUBAME-KFC at Tokyo Institute of Technology ranked #1 as most efficient machine amongst tough competition for this year’s Green500 top honor.
