GRC and ENEOS Release White Paper Underscoring the Importance of Fluid Selection

GRC, the leader in immersion cooling for data centers, and ENEOS, Japan's largest lubricant company, have released a jointly developed white paper, "Enhancing Data Center Performance with Immersion Cooling and Precision-Engineered Fluids." The white paper discusses in detail the many important fluid selection criteria for immersion cooling deployments, and also presents valuable resources that can help IT professionals simplify the fluid selection process and enables them to make the best decision to suit their operational goals and green initiatives.

UK's ETL Awards Contract to GRC to Help Reduce Carbon Emissions in Public Sector Agencies Through the Implementation of Liquid Immersion Cooling for Data Centre IT Equipment

To help accelerate this initiative, GRC has established a UK subsidiary and will launch a Centre of Excellence in a London data centre
