

**Job Title:** Software Developer

**Department:** Engineering

### **Our Company**

GRC is an Austin-based early stage technology company that produces a highly disruptive cooling solution for data center servers. Since bringing the product to market in mid-2010, the company has experienced tremendous growth in manufacturing, sales, production, and personnel and is expanding rapidly to keep up.

### **General Responsibilities**

This position will involve helping in the development, production and maintenance of various systems. You will work closely with customers and engineers to develop new software and expand existing software. This position is aimed towards software development, but some projects might require to use skills from other related fields. The breadth of topics will be wide and will range from fields like website development to server administration. Here is a list of the main responsibilities:

- Software development (web, C++, Java, scripting).
- SQL database maintenance.
- Linux systems administration.

The only guarantee is that every day will be different. You are encouraged to show what you can do, and you are welcomed to pick projects that interest you.

The offer is for a full-time position. Availability to work on-site at the GRC office is required. However, we offer flexible working hours. The Kramer Station of the Cap Metro Rail is just minutes away from our office.

### **Required Skills**

- Knowledge of web (HTML, CSS, JavaScript, JQuery, PHP) and C++ software development.
- Knowledge of interfacing and maintenance of SQL databases.
- Knowledge of Linux administration and scripting (knowledge of web server administration is a plus).
- Knowledge of version control with Git.
- Basic knowledge of computer hardware.
- Problem Solving - Identifies and resolves problems time efficiently; Gathers and analyzes information; Develops solutions; Works well in group problem solving situations; Uses reason.

- Motivated and detail oriented -- must be able to troubleshoot thousands of lines of code quickly and effectively
- Written Communication - Writes clearly and concisely; Edits work; Varies writing style to meet specific needs; Presents numerical data effectively; Able to read and interpret written information. Good documentation of your work is very important.

### **Job Qualifications**

- Bachelor's degree in Computer Science or related certificates and experience focused on software development.
- Experience in the following is required:
  - Web development (HTML, CSS, JavaScript, JQuery, PHP).
  - SQL databases.
  - Shell scripting (preferable Bash).
  - Linux administration.
  - C++.
  - Version control with Git.
- Experience in the following is a plus:
  - Web server administration.
  - Web application development.
  - Web frameworks.
  - Python.
  - Java.

### **Compensation**

- Competitive salary based on experience.

### **Application Instructions**

The ideal candidate is exceedingly hungry, eager, eloquent and competent. Please send a resume and cover letter addressed to [software.careers@grcooling.com](mailto:software.careers@grcooling.com). Please reference "Full-time Software Developer" in subject line. Highlight your strengths and display your ambition. Good luck!
